DETAILED ACTION

Applicant's arguments, see Remarks, filed 4/14/2009, with respect to Office Action mailed 11/7/2008 have been fully considered. Some of the rejections have been withdrawn, others have been maintained, and some are new rejections as a result of Applicant's amendments. Thus, this is a Final Office Action. In summary, claims 1-17 are currently pending, and claims 1-3 are under consideration. Claims 16 and 17 are new claims.

Specification

The objection of the title of the invention is **withdrawn** based on the amendments.

The disclosure is objected to because of the following informalities:

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Appropriate correction is required.

The objection of the abstract of the disclosure is withdrawn based on the amendments.

Claim Objections

The objection of claim 1 because of the following informalities: the terms "independently" and "to" seem to have letters which overlap is withdrawn based on the amendments.

This application contains claims 4-15, drawn to an invention nonelected with traverse in the paper of 4/9/2007. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144). See MPEP § 821.01. Said claims should be labeled as "Withdrawn."

Claim 3 is objected to because of the following informalities: the term "therefor" should be replaced with "thereof" at the end of claim 3. Appropriate correction is required.

Claim 2 and 3 are objected to because of the following informalities: the term "Claim" should be replaced with "claim" in said claims. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the variables R_{22} and R_{23} are not defined but are found in the definition of R_2 .

The compounds in claim 2 lack antecedent basis since the variables R_{22} and R_{23} are not defined.

The rejection of claim 3 for the term "association" is withdrawn based on the amendments.

The rejection of claim 1, the range " R_{10-23} " and " R_{10-19} " is withdrawn based on the amendments.

The rejection of claims 1 and 3 under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for compounds of Formula 1, wherein R_1 = non-spiro, bicyclic imidazo[2,1-b]thiazole and R_4 , R_5 and R_6 are not R_{25} , R_{26} or R_{27} substituted or wherein up to 4 carbon atoms of R_4 and/or R_5 are not optionally substituted by S, O or NR_{24} does not reasonably provide enablement for compounds of Formula 1, wherein R^1 is a spiro compound

and R₄, R₅ and R₆ are R₂₅, R₂₆ or R₂₇ substituted or wherein up to 4 carbon atoms of R₄ and/or R₅ are optionally substituted by S, O or NR₂₄ is **withdrawn** based on the amendments.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 9 and 10 of copending Application No. 12064068. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 10 in the copending Application is drawn to the elected compounds in the instant Application. Furthermore, claim 9 is drawn to simple compositions; the same as claim 3 in the instant Application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicant states, "As the identified Claims have not been allowed, and with the Examiner's understanding, Applicants will deal with the provisional rejection upon the independent allowance of the respective Applications." Thus, the rejection is **maintained**.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
